OVERCAST

W. WIND 5-10 MPH

90% HUMIDITY

- safety meeting on way to  
site

- explained purpose of inspection
- calibrated HNU.  
64 PPM @ 8.52 span
- No reading above background
- entered site from  
C. Pulaski Hwy. (14th St.)
- since the site was  
muddy & interviewed  
the dept before  
doing the complete walk  
through.
- approx. 500-600 cu/yds/day  
were disposed of at the  
BF1 site (w/2)
- there may have been a  
15' below grade starting  
point

- total grade is approx.  
25' to 30'

- All BFI transported

- BFI site is ~11 acres  
bought from N. Chi.

- dirt cover is being  
brought in when  
available to extend  
slopes - Mostly in  
W & NW sides -

- The Lake County Forest  
Preserve Dist. owns the  
land East of Power lines,  
North & West of site.

- only solid waste was disposed  
of at the site (POWLES)  
(see 103-C)

- DiLOMBARDI & I continued the site walk thru by ourselves.
- There is a fence at the east side by the power lines.
- a low swampy area lies to the NE off-site
- one seep was noted on the North slope on the N. chi. side. It appeared in a 2 inch wet spot in the center of a rust-colored ice pocket.
- a fence is also along the north side with one 6' to 8' section knocked down near where the seep is.
- soil being brought in is mostly clay (BF1 side)

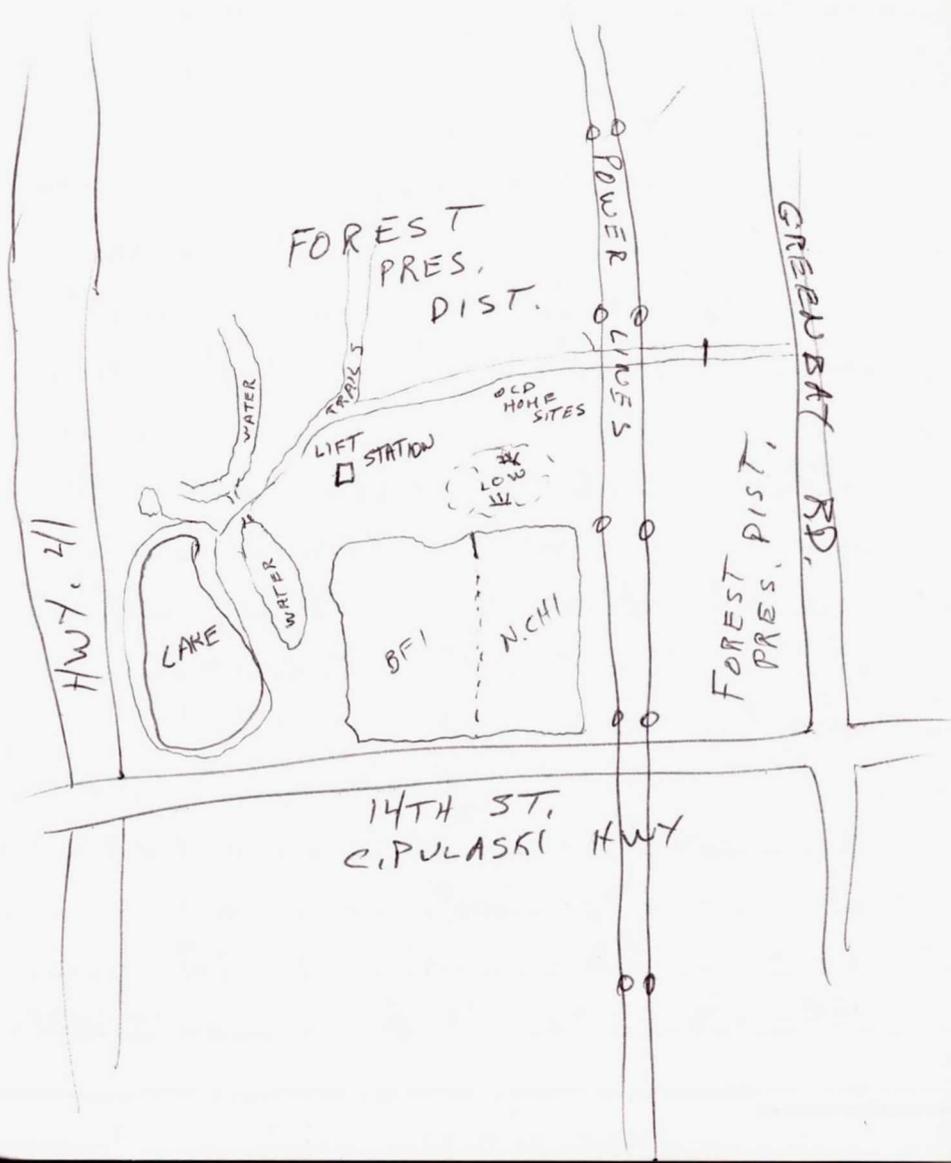

- The N. Shore Sanitary Dist. has a lift station located off-site near the NW corner.
- the homes north of site are gone & no evidence of wells is observable.
- The Forest Preserve Dist. has a lake near 41 & C. Pulaski rd. formed at a borrow pit for the Pulaski overpass.
- there is a large area of standing water in the Forest Preserve that looks like a river or creek but has no outlet. This was referred to as a "waterch" by Forest Preserve Dist. official in a phone conversation prior to SF. MAY be the Skokie River or creek.

- Greenbelt Forest Preserve

- walk through Forest Preserve  
along site to lake,

- left site at ~ 12 PM

- disposed of boots

site was previously owned by  
Natl. Disp.
